👤 About

I am a BCA student skilled in building responsive web applications using ReactJs, Node.Js, and MongoDB. With experience in both front-end and back-end development. My goal is to continuously improve my skills, contribute to innovative projects, and stay updated with the latest web dev technologies.

🏢 Work Experience

Self-employed

Freelancer | Jun 2021-Apr 2022

-Collaborated with clients to design and develop responsive websites using HTML,CSS&Js.
- Customized website themes to meet clients' specific needs and branding.
-Effectively managed multiple projects and deadlines while ensuring client satisfaction.

📂 Projects

Portfolio Website

I have created a portfolio website to showcase my expertise in web development. I have utilized various tools such as ReactJs, TailwindCSS, Framer Motion and ShadCN. To demonstrate my proficiency in ReactJs, I have included several minor projects in the projects section of my portfolio.

↗

Expenses Tracker

I have developed an Expense Tracker application to help you keep track of your daily expenses. This app allows you to store and save information about where you spent your money and how much.

Netflix Clone ↗

Tasks Management Application

I have created a task management application using the ReactJS framework that leverages the browser Document Object Model (DOM) to store data. This ensures that tasks are not lost when the browser is closed, providing a reliable and user-friendly experience.
